

Simplifying the present,
anticipating the future

Monastier di Treviso, April 8th 2021

TEXA OFFICIAL SELVA MARINE SUPPLIER
NAVIGATOR TXB Evolution is the tool chosen by the prestigious Italian marine engine brand for the electronic diagnosis

TEXA and Selva Marine settled a collaboration agreement on the basis of which the company in Veneto will supply the official electronic diagnostic tool **NAVIGATOR TXB Evolution to all the Selva dealerships and workshops worldwide**. In fact, the technicians of the two companies developed a specific software for the maintenance on the engines of the company in Tirano, rich in highly evolved contents such as technical sheets, nominal values, interactive electrical diagrams.

TEXA, founded in 1992, has been operating since 2010 in the marine propulsion industry, in which it has acquired a leading position in the field of multi-brand diagnostic instrumentation with a series of products rigorously Made in Italy.

"Signing this agreement with Selva Marine - said **Mario Giacomella, TEXA Bike and Marine Product Manager** -, whose engines have won 40 world titles, 65 European titles and 150 national titles, is a source of pride and confirms the quality of our solution not only as a multi-brand tool, but also as an official tool."

TEXA

Established in 1992, today Texa is the European leader in the design, industrialisation and production of diagnostic tools and tele-diagnostic devices for automobiles, motorcycles, trucks, agricultural vehicles and marine engines. TEXA is present all over the world through an extensive distribution network and markets directly in Spain, France, Great Britain, Germany, Poland, Russia, United States, Brazil and Japan, through its subsidiaries. TEXA currently employs over 730 people worldwide. The workforce is young (the average age is 33), 45% are graduates, including around 150 engineers and R&D specialists.
